Jennifer

This seems very reasonable. We will remove your logo later this week. Please let me know if you would be interested in future meetings, however. With the pent up demand for vetting interesting risk assessment methods, we should be able to easily fill out the next series of workshops. In fact, later this week, the Risk Assessment Advisory Committee of this workshop series will be looking for a venue for a workshop later this year.

Cheers!

Michael

Hi Michael, after checking with our ethics folks, since EPA has not given money to support this event, you will need to remove EPA's logo we are participating and will have a couple of people attending

Thanks. i hope all goes well and let me know if you have any questions

Dear Tom

We have EPA listed as a sponsor/endorser of this workshop series, base on the prior support of the RAF. See: [https://www.tera.org/Alliance%20for%20Risk/ARA\\_Dose-Response\\_Sponsors.htm](https://www.tera.org/Alliance%20for%20Risk/ARA_Dose-Response_Sponsors.htm). Please let me know if you want us to remove EPA's name and logo from the promotional material and website. If you decide to maintain EPA's endorsement, then the next meeting will likely be in September of this year, and the Advisory committee will be looking for a venue to hold the meeting. RAF's previous support included providing a venue at the EPA offices in Crystal City.

You may also know that Annie Jarabek of NCEA is a member of the science panel for this workshop series, where her contributions have been significant. Several EPA staff have also contributed to the over 40 available case studies.

Cheers!

Michael...

Dear Drs. Sinks and Orme-Zavaleta

As you may have noticed, we have scheduled our next workshop in this series at the offices of the Texas Commission on Environmental Quality for next February, and are excited to again be reviewing new methods for all aspects of risk assessment. The main support for this workshop series comes from the review of cases studies on risk methods. If EPA has other methods on which you wish some feedback, please give me a call. However, we are also seeking small tax-deductible contributions of money and/or time to enhance the workshop. For example, a contribution of \$5000 or less will allow us to offer free registrations, which is particularly important for attendees from government or nonprofit organizations.

On behalf of the advisory committee (copied on this note), we would again be thankful for your support and/or endorsement.

Cheers!

Michael
